

RAPID REPAIR

RAPID REPAIR - VERTICAL

Five Star® RAPID REPAIR

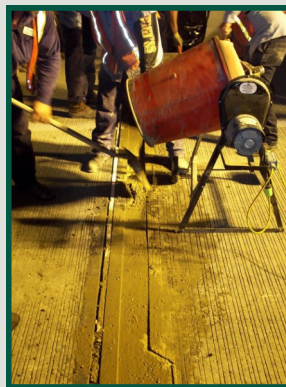

A high performance, fast turnaround, single component cementitious repair mortar for horizontal or formed vertical repairs. Five Star® Rapid Repair is versatile, exhibits high early strength, and provides durable long-term repairs. It may be extended with coarse aggregate to make a fast-setting concrete for deeper placements.

Applications

- Floors and slabs
- General repair of concrete structures
- Expansion joint rebuilds
- Steps and walkways
- Parking structures
- Formed vertical repairs

Advantages

- High early strength
- Open to traffic in three hours
- Excellent freeze/thaw resistance
- Low chloride ion permeability
- One component for ease of use
- Coarse aggregate extension
- A Five Star® green product

Five Star® RAPID REPAIR - VERTICAL

A one component, fast-setting enhanced hydraulic cement mortar used for repair of vertical and overhead concrete surfaces without formwork. Five Star® Rapid Repair-Vertical provides a permanent, durable repair with high bond strengths and low chloride permeability.

Applications

- Repair of concrete walls, ceilings, and other structural members

Advantages

- Vertical or overhead applications
- One product for thick or thin applications
- Excellent freeze/thaw resistance
- One component for ease of use
