PRODUCT USED:

Five Star Structural Concrete® Underwater Hand Pack

SIZE OF PROJECT 320 x 36 lb. Units – Over 5 metric tons

The Challenge — Haifa Port, Israel's largest and leading port, is located in a natural, protected bay and includes many facilities that allow for the shipping and transportation of all types of cargo, as well as docking facilities for large passenger liners. During the positioning and sinking of concrete caissons that were cast on rigs and then towed to their installation locations, the caissons sustained mechanical damage. Once in place these underwater caissons needed to be repaired.

The Solution — Five Star Structural Concrete® Underwater Hand Pack, supplied locally by Five Star® licensee Shoshani & Weinstein, was chosen for its high early strength and because it is ideal for small hand placements with minimal underwater washout. Professional divers from Nashon Ltd. were called in to make the repairs and this project was completed with no delays to the installation timeline.

STRUCTURAL CONCRETE® UNDERWATER HAND PACK

Hand Applied, Rapid Strength Underwater Repair

PRODUCT DESCRIPTION

Five Star Structural Concrete[®] Underwater Hand Pack is a rapid strength gain, single component, permanent concrete repair material intended for underwater application by hand or trowel. This concrete repair material allows small volume hand placements with minimal underwater washout. Designed for placement in tidal zones and underwater, application thickness may range from one-half inch (13 mm) to several inches in a single installation. Five Star Structural Concrete[®] Underwater Hand Pack provides corrosion protection of steel reinforced structures with migrating corrosion inhibitor technology and very low chloride ion permeability.

ADVANTAGES

- Rapid set underwater placement
 Minimal washout
 Chloride and sulfate resistant
 High early strength
 Variable application thickness
- Saltwater resistant

USES

- Underwater repair of concrete tanks, dams and hydraulic structures
- Filling underwater concrete

cavities and voids

- One component for reliability and ease of use
 Migrating corrosion inhibitor
- Migrating corrosion inhibitor technology
- Underwater repair of concrete piles, piers, seawalls and marine structures

FIVE STAR® SERVICES

- Design-A-Spec[™] engineering specification assistance
- Technical on-call center with field and project experienced staff
- Field support representatives for on-site consultation
- Corporate research laboratory available to customize products for unique applications

For worldwide availability, additional product information and technical support, contact your local Five Star[®] licensee, distributor, local sales representative, or you may call the Five Star Products' Engineering and Technical Service Center at 1-800-243-2206 (from the U.S.) or +1 203-336-7900 (outside the U.S.).
