

FIVE STAR FOCUS

Instant Grout

Quick-Turnaround Precision Grouting
in Cold Weather Applications

Rapid Strength Gain for Your MRO
Projects or New Installations

Simple Installation Process: Form, Pour, Perform!

Five Star® Instant Grout – Why It’s Specified...

Originally developed for use on the Alaska Pipeline, Five Star® Instant Grout is formulated using an advanced technology ideal for cold-weather applications. It is a rapid strength gain, non-metallic, non-shrink grout for supporting machinery requiring precision alignment and quick turnaround.

When protected with temporary heating for just 4-6 hours, Five Star® Instant Grout can be poured in near freezing temperature of 40°F (4.4°C). Once the grout reaches 1,000 PSI (6.9 MPa) from time of placement it no longer requires protection from freezing temperatures.

ADVANTAGES

- Eliminate/minimize tenting and heating on freezing days
- Wide temperature range: 35°F - 90°F (2°C - 32°C)
- Air release technology per ACI 351.1 R
- 95% Effective Bearing Area (EBA) is typically achieved following proper grouting procedures
- Fast turnaround time
- High 4-hour compressive strength

USES

- Low temperature placement
- Non-shrink grouting of structural steel and precast concrete
- Fast turnaround grouting of machinery baseplates to maintain precision alignment
- Installation of dowels and anchors
- Support of tanks and vessels
- Support of static loads

Formulated with an advanced technology ideal for cold weather applications, while providing the greatest reliability, and precision non-shrink performance.

When tested in accordance with ASTM C 827, Five Star® Instant Grout shows positive expansion and meets the performance requirements of ASTM C 1107-02 and CRD-C 621-93 specifications for non-shrink grout.

i For more information on this cold weather Instant Grout, or any other Five Star® products, contact your distributor or the Five Star® Rep for your area. Complete data sheets are available on our website: FiveStarProducts.com. Additional Technical and Field Support are always available to you from Five Star Products.
