

# FIVE STAR FOCUS

Polymer-Modified Cementitious Coating

## Five Star® Waterproofing

This self-curing coating is designed to create a rigid barrier that resists very high water pressures.

Foundations

Manholes

Vaults

Tanks

Concrete &  
masonry surfaces

Vertical & horizontal  
applications

Base for moisture-  
sensitive coatings

Elevator/escalator  
pits

Don't trust your projects to anything less than superior results with Five Star® Waterproofing

# FIVE STAR® WATERPROOFING Self-Curing, High Performance Coating

Five Star Waterproofing  
SKU 10100

Five Star® **Waterproofing** is a two-component system consisting of 50 lbs (22.7 kg) of dry material and a one-half gallon (1.9 liter) plastic container of Five Star® Waterproofing Liquid packaged in a plastic pail.

Each kit yields coverage of approximately 42 square feet (3.9 sq m) when troweled to a 1/8 inch (3 mm) thickness, or when brushed in two coats at 1/16 inch (1.5 mm) each coat. No allowance has been made for surface roughness, irregularities, waste, or spillage.

## PRODUCT ADVANTAGES

- Effective on negative and positive side
- Excellent resistance to chloride ion penetration
- Self-curing
- Can be trowel or brush applied

## WIDE RANGE OF USES

- Concrete and masonry surfaces
- Vertical and horizontal applications
- Base for moisture-sensitive coatings
- Elevator/escalator pits
- Foundations
- Manholes
- Vaults
- Tanks

### Superior Application

- Apply two to three coats to obtain a minimum total applied thickness of 1/16 inch (1.6 mm) leaving no pin-holes or voids.
- Allow a minimum of four to eight hours between coats, depending on temperature.
- Always coat entire surface continuously, keeping a wet leading edge whenever possible. When not possible, only stop at corners or edges.

### Maximum Waterproofing Protection

- Apply in one coat **by trowel** to a minimum 1/8 inch (3 mm) thickness, completely filling all holes and voids; leaving no pinholes.
