**Precision Cementitious & Epoxy Grouts | Concrete Rehab & Repair**

**MADE IN BRITAIN<sup>®</sup>**

## PRECISION CEMENTITIOUS GROUTS

Five Star® Cementitious Grouts are industry-leading, high-performance, non-shrink grouts designed for static or light dynamic loading and high-temperature applications, where precision alignment and a high EBA are essential. They consistently deliver across varying temperatures and job site conditions.

### FIVE STAR® GROUT

Designed for precision alignment and support of machinery and equipment, suitable for applications from dry pack to flowable.

### FLUID GROUT 100

Ideal for long-distance pumping and tight clearances down to ½ inch (12mm).

### HIGH STRENGTH 130 GROUT

Achieves 40 MPa in 1 day and 90 MPa in 28 days. Ideal for high-load applications requiring precision alignment and support of heavy machinery.

## STRUCTURAL CONCRETES

Five Star® Structural Concretes provide superior strength and durability for demanding applications, including vertical, overhead, and underwater repairs. Our single-component materials bond seamlessly with existing concrete, ensuring quick, dimensionally stable repairs for infrastructure, marine, and industrial projects.

### STRUCTURAL CONCRETE®-

Fast-setting, high early strength mortar for small to medium structural repairs and overlays, with moisture-sensitive coatings applicable within 4-24 hours.

### STRUCTURAL CONCRETE® V/O

High-strength repair material for vertical and overhead applications, delivering rapid restoration of structural integrity.

### STRUCTURAL CONCRETE®

#### UNDERWATER HAND PACK

Rapid-setting, high early strength, hand-applied repair material for underwater concrete restoration. Ideal for tidal zones.

## CONCRETE SURFACE REPAIR

Five Star® Concrete Surface Repair Solutions are designed for durable, high-strength repairs to restore structural integrity to concrete surfaces, from industrial floors to equipment foundations.

### REPAIR CONCRETE

A normal-setting, one-component hydraulic cement material with a long 60-minute working time, ideal for pourable and pumpable repairs of concrete structures. Suitable for industrial floors, slabs, and equipment foundations.

## MATERIAL SCIENCE REDEFINING STRENGTH AND DURABILITY

Five Star Products is an industry-leading specialty construction materials company focused on the engineering, manufacturing, and application of precision epoxy and cementitious grouts, and concrete rehabilitation and repair solutions for challenging applications and environments. We are dedicated to developing innovative technologies that help ensure consistent, reliable success for our customers.

We proudly provide **unparalleled support** at the engineering, plant, and contractor levels, which includes:

- Application Mock-Ups
- Installer Training
- On-Site Support
- Pre-Grout Meetings
- Product Demos
- Product Selection Guidance
- Project Pricing
- Specification Design Guidance

We are active in several **market sectors**:

*All Five Star UK Products are made in Britain, exclusively distributed by Precon Products, approved for use by National Highways, and listed on NBS UK for specifying.*
